Natural Gas For Bassano Arouses Much Interest

Subject Discussed at Last Meeting of Board of Trade

Members at the last Board of Trade meeting, April 10th, showed considerable interest in the discussion of a gas supply for the town. The Hudson Bay-McDonald Oil Co. in a letter gave a brief outline of their proposed plan with respect to drilling near Eyreton, about 20 miles south and a little east of Bassano. The letter was in reply to an enquiry from the Board of Trade concerning the possibility of the company supplying gas to Bassano if gas should be found. The company said it was planned to drill on the south east corner of Sec. 24-17-18, and it was quite possible oil and gas may be found there. They were not in a position, said the letter, to consider any plan for piping gas to Bassano. As Bassano already has a gas well of small production it was felt by some of the board members that the town council should be advised of the contents of the letter. The Hudson Bay-McDonald Oil Co. endeavor to interest the company in supplying gas to Bassano, possibly by drilling a well here. A resolution to this effect was passed.

Will Plant Trees at Cemetery
The Board of Trade meeting was attended by about 15 members, with President Wm. McLeod in the chair. The president announced that a cemetery committee has been appointed consisting of Rev. P. C. McCree, Geo. Travis, and J. H. McLeod. In reporting for the cemetery committee Rev. P. C. McCree said his committee recommended the planting of about 50 trees on the west side of the cemetery this spring. The care of the trees would be taken charge of by the Women's Institute, and watering could be done by means of a wagon tank. A few guards had already been placed around the cemetery grounds, and the graves and walls will be burned and painted.

Trees and Irrigation System
A. C. Connolly, in reporting for the tree planting and cemetery committee, said that only 200 trees could be obtained from the C.P.R. nurseries at Brooks. This was not much more than enough for replacement, and citizens wanting trees would be advised to deal direct with a nursery if they wished to be sure of getting a supply of trees. Mr. Connolly made a motion that the town council be asked to build a shelter over the stone in the auto camp, the shelter to be about 15 feet square, and with a waterproof roof. The motion carried.

In reply to a question, town engineer Frank Mead said that the town irrigation system was ready for use as soon as water was available.

The Swimming Pool
Geo. Travis reported for the swimming pool committee. He outlined further improvements which it was planned to make on the pool this year. These improvements include the building of more dressing rooms; laying gravel on the ground around the pool to eliminate

Gem News

DEM. April 10—Miss Edith Selfridge returned to Calgary on Monday to continue her musical education at the Sacred Heart Convent. She plans to enter a musical festival in Edmonton next month, and also take her to A. B. exams in June. Her numerous friends in Gem wish her every success in these two events.

Mrs. Peck, who has been suffering from influenza is now suffering from a relapse and is again in bed. Mr. and Mrs. McKay are suffering from an attack of influenza. Mr. Grainger also has the flu. Mr. and Mrs. Ed Johnson are visitors in the Colony, guests of Mr. and Mrs. Ed. Letchman.

Mrs. Atkins entertained at cards on Saturday night.

Mrs. Gouling spent Thursday afternoon with Mrs. Keeling. M. A. Parrott, of Husar, was in the Colony over the week-end.

Mrs. and Mrs. Grivies were Monday visitors at Maguire's.

Charlie Bramble has been visiting in the Colony during the past few days.

On Wednesday last Mr. Gairbairn and the Rev. Garbairn were in the Colony on C. P. R. business.

A cordial invitation is extended to all the community to attend a service on Sunday evening. The student pastor will preach. Service at 7:30.

On Thursday last several ladies of the Colony pleasantly surprised Mr. Fryberger who is leaving the district in the near future. An enjoyable time was spent by all present. The ladies also celebrated Mrs. Rumble's birthday. Mrs. Jacob, who is a visitor here, made and decorated a beautiful cake which Mrs. Rumble and her family enjoyed very much.

Several of the young people of the Colony enjoyed a pleasant Friday night at Chamberlain's. Only for the week-end a larger crowd would have been there.

Deep Test To Be Made Near Eyreton

A deep well of possible gas and oil production will be drilled on Sec. 24-17-18, about 20 miles south and a little east of Bassano. The well, or possibly more than one well, will be drilled by the Hudson Bay-McDonald Oil Co. and the drilling site is on Hudson Bay land which the company holds perpetual mineral and petroleum rights in. It is understood that the drilling company plan to spend about one hundred thousand dollars on a test and with a water-proof roof. The motion carried.

In installing a water supply line from the town waterworks system which would maintain a continuous circulation of water in the pool. The cost of these improvements was estimated to be about \$250. The committee, said Mr. Travis, had now \$100 cash in the bank.

WHEAT POOL BUYS ELEVATOR IN BASSANO

Ogilvie Elevator Taken Over by the Pool
Of the thirty new pool elevators, contracts have been let for the building of eighteen, and twelve have been purchased from various elevator companies. New Pool elevator will be built at Delson, Inuvik, Gravel, Conrich, Brooks, Grantham, Strangmire, Diamond City, Brockville, Harwood, River, Bitter Lake, Wells, Nerve, and Lea Harst.

The twelve elevators that have been purchased are located at Midland, Delson, Brooks, Inuvik, Gravel, Conrich, Brooks, Grantham, Strangmire, Diamond City, Brockville, Harwood, River, Bitter Lake, Wells, Nerve, and Lea Harst.

Work on the elevators for which contracts have been signed will be started right away. All these elevators will have a capacity of from 35,000 to 40,000 bushels each.

Duchess News
DUNDEE, April 11—Mrs. Smith, who has been visiting her daughter, Mrs. Purcell and family, returned to her home in Calgary Saturday.

Mrs. Wade Dowling and children, who have been visiting her parents in Massachusetts, returned last Sunday night.

The young folks had a party with the home of Mr. and Mrs. A. McKinnon for J. Wilberg, who is leaving for Spirit River.

Mr. Morton, of Bassano, will take Mr. Wilberg's place on the Royal Bank staff.

Mrs. Read is holding a furniture sale next Wednesday, April 17th.

Mr. J. Anderson left for Calgary on Tuesday by car.

Mrs. Foote, who has been visiting her sons in Chicago the past three months, has returned to her home in the Chancy district.

Mr. Woodward left for Calgary Wednesday by way of Brooks.

Marshall Swenson left for Standand on Tuesday morning on a business trip.

Harold Hole and sister, Miss Ruth, and Miss Kilde Dadds motored to Gem Sunday evening, bringing back Miss Jean Dadds, who is spending the week here.

Kenneth Ferguson is visiting his brothers, John and Andy Ferguson. Mrs. Alice Underwood, who was ill with the flu, is back at work in the S.B. Ramer store.

Paying tribute to the work of Canadian scientists, especially those working on agricultural problems, J. H. Gribble, deputy minister of agriculture of the Dominion, said that the profound study and unceasing application to the problem has at last produced results which seemed in a fair way to solve the difficulties in the way of combining the best of the two systems. This he added, was obtained through the close co-operation of the plant pathologists and plant breeders.

Time of Turning On Irrigation Water Is Now Uncertain
The spell of colder weather, the week has caused a postponement in the date when irrigation water will be turned into the ditches. H. O. Angell, chief of the C.P.R. D.N.R. in Bassano, says that the prevailing temperatures which have prevailed since last week make it impossible to supply water by April 15th. The date when the water will be turned on depends entirely on the weather, and no date can be set until it warms up considerably.

Bassano Girl Makes Favorable Showing In Oratory Contest

Although her first effort in taking part in the oratory contest held in Calgary last Thursday evening, April 10th, Miss Queenie Brandt made a most favorable impression with her address, "How oratory," "Canada Among the Nations," was splendidly delivered, and was much superior to that of some of the other contestants.

Walter B. McDonald, of Red Deer, won the contest.

Air Men Are Building 'Plane

For Scott-Sambrook Air "Boat" Begins To Take Shape

Building an airplane requires a thorough knowledge of aeronautics and a high degree of mechanical skill. Many of the great designers of the world are now working on the various parts of the machine, which must be assembled and adjusted to a very fine degree of measurement.

The builders of the Scott-Sambrook airplane appear to possess all the necessary knowledge and skill. The airplane is now under construction at the Scott-Sambrook factory in Calgary, who is an air pilot, and mechanic of many years' experience, is supervising the building of the "air-boat." The Scott-Sambrook is doing most of the mechanical work.

The frame of the fuselage is now all completed; also the frames of the main planes and rudder. The wings have yet to be built, the covering placed on the fuselage and wings and the motor installed. The frame work is practically all metal, hollow steel tubing being used. Putting together the various parts of the machine must be a very delicate and exacting task.

Work on the "air-boat" was started in the garage, but early this week all the parts and tools were moved to the building next door, which is now being used as a workshop.

This airplane is designed to carry three people, and will have a speed of 100 miles per hour or more.

RUSTLESS WHEAT MAY SAVE MILLIONS

Scientists Obtain Encouraging Results in Experiments

Efforts of agricultural scientists to develop a rust resistant wheat, which would save millions of dollars annually, are meeting with success.

At a meeting in Winnipeg of the Dominion Committee on rust, a search, organized under the auspices of the Dominion Department of Agriculture and the National Research Council, reports delivered show that rust resistant wheats which appear to have good baking and milling qualities have been secured through the efforts of the plant breeders engaged on the problem and now await development.

Mr. W. P. Fraser, of Calgary, motored to Chancellors to visit Mr. and Mrs. R. Fraser last Saturday. He reported the Calgary road as being in terrible shape after Friday's storm.

Anyone finding a new spare tire and carrying case on the Calgary road please leave with R. Fraser at the Chancellors post office, or at Fraser's farm, near Dryden.

Mr. and Mrs. Simon Fraser, Jr. arrived in Chancellors last Monday from Scotland. They are the guests of Mr. and Mrs. R. Fraser for a few days before proceeding to the J. S. Ranch Husar, where they are the guests of Mr. and Mrs. Simon Fraser Sr. They are going to visit their own home, the Kibbly Ranch.

Mr. and Mrs. J. M. Wheatley, Mr. and Mrs. Hansen, were visitors to Calgary last week.

Wm. Fraser, of Calgary, motored to Chancellors to visit Mr. and Mrs. R. Fraser last Saturday. He reported the Calgary road as being in terrible shape after Friday's storm.

Anyone finding a new spare tire and carrying case on the Calgary road please leave with R. Fraser at the Chancellors post office, or at Fraser's farm, near Dryden.

More Cream Coming To Local Creamery

W. A. Brodie, Manager, Bassano Creamery, Reports Business Is Encouraging

That farmers in the Bassano and adjacent districts are yielding more and more the value of keeping dairy cows is evident in the increased amount of cream that is being shipped to the Bassano Creamery.

W. A. Brodie, manager of the Bassano Creamery, reports that he is handling considerably more cream than at this time last year, and indications point to a greater volume of business this coming summer.

Farmers who ship cream to Bassano have obtained good satisfaction with grades and prices, and Mr. Brodie hopes to eventually get almost all of his cream output of this territory.

Further improvements are now being made in the creamery building. A concrete floor is being laid in the cold storage room, and the addition of an ice house is also planned.

Countless News To Be Supplied With Electricity

COUNTRESS, April 11—Mrs. Ralph Burrows and infant son returned from Bassano Hospital Sunday. Both are doing fine.

Carol was in the district this week doing some piano tuning.

Rhoda, Helen, and Kathleen Kerr returned to their home at Inuvik Saturday after a pleasant week visiting with their Cousin friends.

Miss Marie Chamberlain left on Sunday for Wayne.

Household effects, pots and food have been unloaded at Countress the past week for the newcomers.

Mr. and Mrs. P. T. Smith entered Saturday for a great summer. Mr. and Mrs. G. M. Anderson, Saturday evening. Bridge was played, and a most enjoyable evening spent by all.

Mr. and Mrs. Cowan, Knights and Alice were visitors at the Gamble home today.

Carol has become Gamble went to Bassano Saturday to take their music lessons.

Snow Storm Halts Field Operations

Cooler Weather Prevails and Thermometer Registers Low Mark

A cold wave moving down from the north and causing the thermometer to set far below the freezing point dissipated the balmy weather that prevailed early last week.

A snowstorm accompanied by a stiff wind from the northwest struck the district last Thursday evening, April 10th, and continued all day Friday.

It is difficult to estimate what depth of snow fell as the wind laid the ground bare to spots, and piled up drifts three feet in depth.

Most of this snow has now disappeared, but the weather has not warmed enough to permit a resumption of field operations on the farms.

The farm machinery agents continue to do a brisk business, and now tractors, plows, seed drills, etc., are moving out to the farms.

Local Sportsmen Form Fish And Game Association

Propose Introduction of New Species of Fish and Game Birds

The Bassano Branch of the Alberta Fish and Game Association, was formed at a meeting of local sportsmen held in Harry Smith's office last Monday evening, April 8th. The officers elected were:

President - Dr. A. P. Dabiva
Vice Pres. - Dr. E. E. Barlow
Sec. Treas. - Sgt. J. N. Casper
Hon. Sec. - Dr. G. A. Scott
R. Milroy, B. M. Hall, Harry Smith, A. R. Maurer.

Fifty-two members have already joined the association and this number will probably be increased.

The local organization, as a branch of the Alberta Fish and Game Association, will embrace the same rules and regulations as the parent body, and works along similar lines.

The association aims to introduce new species of fish and game birds, and seeks to afford adequate protection to game of all kinds.

Bill Fortier Still Swinging The Bat

Writes to Friend in Bassano Telling of His Activities in Coquille, Oregon

A few days ago a local man received a letter from Bill Fortier, of Coquille, Oregon, formerly of Bassano, an ardent baseball player, says he is still in the game and still going strong. Although not quite so good as he used to be, Bill says, "It can still make the boards rattle, and hit 417 last year." He is behind the bat in his old position, and running the local team.

Mr. Fortier says he owns a good pool ball business in Coquille, and he and the family are in good health and doing fine. By reading the Bassano Mail he keeps well posted on the people in his town.

In concluding his letter Bill sends his best wishes to all his old friends in Bassano.

Two More Towns To Be Supplied With Electricity

Husar and Chancellors Are Wired for Current by Calgary Power Company

The two towns of Husar and Chancellors will soon be lighted with electricity. Wire has already been strung in both towns, and some Jack Allen district superintendent of the company, and as soon as the frost is out of the ground an extension pole line will be built into both towns.

About seventeen miles of line are to be erected, said Mr. Allen, and when the weather warms up a hole-dripping machine will be placed on the job so that fast time may be made with the work.

The company expects quite a large consumption of current in both Husar and Chancellors. A number of stores and houses are already wired, and almost every place in both towns has been in constant use.

Several farmers whose property is close to the proposed pole line will be able to install electric lights at no great cost.

Bassano customers of the electric light company have been getting good service during the past few weeks. The hydro generating unit at the dam has been in constant readiness and use in emergencies so that Bassano was supplied with current even though there was a break in the line between here and Calgary.

Thief Raids Rooms Of Police Magistrate

A young fellow named Bernhard Laubi, 21 years of age, had the temerity to raid the rooms of Police Magistrate A. G. Ross and steal a razor and other shaving equipment.

He was arrested at 11:30 p.m. on Sunday night, and notified Sgt. J. Casper at once. When half an hour later he was taken to the police station.

Justices of the Peace H. Riddle, of the court, and J. H. McDonald, of the court, tried the case, and the accused was sentenced to serve two months at Leithbridge.

Life Of Pioneers Shown In Picture

Zane Grey Picture Shows Jack Holt in Western Role

Voyagers of those white topped caravans of cowboy days, have made their way across the desert to conquer and settle the west. In "The Vanishing Pioneer," the picture shown at the Gem Theatre Friday and Saturday this week, April 12th and 13th, for the life of the pioneer, the picture is a picture of the life of the pioneer.

George was famous for being late
at his appointments. He was at last
engaged to be married to a young
lady in a neighboring city, and when
the day of the ceremony arrived,
George, as usual, did not put in an
appearance.
The bride was on the verge of nerv-
ous prostration when the following
telegram was received from the mis-
sing bridegroom:
"Dear Helen: Missed the early
train. Will arrive on the 4:31. Don't
get married until I get there. George"

you found your husband was leading
a double life?"
Wife: "Oh, I rediverted."

PROTECT YOUR REWARD

WHAT
(Experimental Farm Note)

The Dominion cereals section states that
the supply of Reward wheat available for
distribution this spring is now
completely exhausted. He states that
at least five thousand farmers will be
testing this new, promising variety
of wheat this year throughout the
three prairie provinces, the result of
which test should go far to deter-
mine the future of the variety, at
least in many sections.

Since the amount of seed available
to each farmer through the Federal

Department this spring was only two
bushels, the area sown in each case
will necessarily be small; the above
official consequence urges, that special
care be taken to prevent contami-
nation by other varieties. He sug-
gests particularly, that the seed be
sown only on summerfallow or
breaking, and that the seed plot be
surrounded with a drill width, to some
other crop such as oats, the latter to
be cut before reaching maturity.
Care will also have to be taken in
the harvesting and threshing, other-
wise this seed will become mixed
and rendered relatively valueless.

THE BASSANO MAIL
Published Every Thursday
Walter A. Smith
Editor and Publisher
Subscription—\$2.00 a year in Canada
\$2.50 in the United States

Yes, she had some bananas. Fired
on by an American assigned boat
the Norwegian ship *Zeus* actually
had a load of bananas and not run,
as suspected. It just seems as though
these coastguard boats must have to
have some shooting practice.

The Calgary ratepayers turned
down the hospital bylaw, but they
will not have the opportunity to vote
on the expenditure for sewage dis-
posal works. Special enactment as
made by the Alberta Legislature for
this purpose, and the city ratepayers
have nothing to say about it.

BASSANO COMES INTO HER RIGHTS

The Bassano town council and the
residents of the town in general
should feel satisfied with the result
of the Bassano-Calgary sewage dis-
posal dispute. The town council
was persistent in demanding that the
Provincial Health Act be enforced.
When Calgary, through pressure
from the Provincial Health Depart-
ment, agreed to observe the act by
building a sewage disposal plant, the
council was still not satisfied, for
they wanted this work to begin at
once.

The tenacity with which the town
council pursued their demands has
brought good results. The order has
gone out from the Provincial Health
Department that Calgary must spend
on sewage disposal works, not less
than \$250,000 a year during 1929 and
the next succeeding four years, mak-
ing in all a total of \$250,000.

It was a long battle, and the case
looked almost hopeless at times, but
at last, after many years of waiting,
Bassano will get a water supply free
from the contamination by the City of
Calgary.

TAKING TO THE AIR

The public regarded the first mo-
tor car as a new fangled device
which made itself a nuisance on a
highway of horse drawn vehicles. To-
day, the highway swarms with mo-
tor cars, and a horse on the highway
is something of a curiosity.

Flying was first looked upon as a
highly dangerous form of amusement.
An incredulous public seldom in
amused toleration when it was sug-
gested that the airplane would some-
day be an important factor in trans-
portation. Today, in many parts of
the world, airplanes make regular
trips with mail, express and passen-
gers.

The airplane has come to stay. Its
popularity is increasing every day.
Air mail routes are being established
in many countries. Passengers, ex-
press, and freight are being carried
by this new and rapid method of
transportation.

One of the newest phases of avia-
tion is the "tramp" airplane. Like
the tramp steamer, it has no particu-
lar route to follow, but goes from
point to point, picking up whatever
freight it can get as it goes along.

While the great majority of people
are still content to do their travel-
ing on the ground, there is a growing
interest in flying, and a development
of "air mindedness" that will, before
many more years have passed, re-
sult in a tremendous increase in air-
plane passenger traffic.

The airplane has come to stay. And
with improved machines giving great
efficiency, and a much greater de-
gree of safety, the airplane may, with-
in the next generation, take premier
position over the automobile as a
passenger vehicle.

What To Do

If you're feeling tired and blue,
And you don't know what to do,
Do nothing.
If your appetite's not right,
And you're waistband's getting tight,
Stop stuffing.

If you're plans are awry,
And you feel you want to cry,
Do fishin'.
And wish that you were dead,
Stop whinin'.

If you know you talk too much,
And you're neighbor's feelin' touch,
Stop talkin'.
If you're nerves are all a-kew,
There is one good thing to do,
Go walkin'.

If you're running into debt,
And can't say for what you get,
Stop buyin'.
If you'd like to reach the top,
And are just about to stop,
Keep tryin'.
—Greenville Kleiser.

Try Mashed Potatoes

There is nothing that breadens one
like travel, unless it is too many
hot fudge sundae.

Paint Up - Clean Up

EASYCOAT

This is the paint for inside use. It is not a Gloss
or a Flat paint. It is easy to apply, has a good
covering capacity and will dry in four hours.

MURESCO

This must be mixed with boiling water. It does
not show streaks and covers well.

ENAMEL

We have enamel that dries in four hours. This
is a good feature as you can give the articles
two coats in one day.

VARNISH

We also have varnish which dries in four hours.
This stands up on floors or furniture.

HOUSE PAINT

We have it in most of the colors.

The Turn of the Road
Soft, gray buds on the willow.
Warm, moist winds from the
bay.
Sea-gulls out on the sandy beach,
And a road my eager feet would
reach.
The leads to the far-away.

Duet on the wayside flower.
The meadow-lark's luring tone
is silent now, from the grasses
tipped
With dew at the dawn, the pearls
have slipped—
Far have I fared alone.

And then by the alder thicket
The turn of the road—and you!
Though the earth lie white in the
noontday heat
Or the swift storm follow our
harrying feet
What do we care—we two!

How Much
This is one from a British paper:
While motoring in this country an
American tourist stopped at a garage
to have a small defect in his accumu-
lator remedied.
"Say," he inquired, when the job
was done, "what's the charge for this
battery?"
"One and a half volts, sir."
The American was puzzled.
"Yes," he said at length, "but how
does that work out in American
money?"

Mother: "You mustn't eat ice
cream like that. I know a boy who
ate ice cream so fast that he died
before he had eaten half."
Willie: "What happened to the
other half?"
"I don't believe you love me any
more," said the girl.
"What makes you say that dearie?"
asked the boy anxiously.
"Well, for the last week you have
left every night before father threat-
ened to throw you out."

Better Step on It
"Pa," said the kid, "what is mean-
ing by being 'twixt the devil and the
deep sea?"
"It is the position a man is in, son,
when the traffic cop signals to stop
and the back-seat driver orders him
to go ahead."

"Jack says when we're married
he's not going to allow me out of
his sight."
"I shouldn't worry about that,
dear. What you want to know is
how much he is going to allow you
out of his income."

If you appreciate PRESTIGE

THE purchase of an Oldsmobile is in itself
a tribute to your individuality . . . indic-
ating an appreciation of the finer points of
automobile quality.

For, although the finer Oldsmobile possesses
a host of features (mechanical and structural),
which distinguish it from all other cars in its
price-range, it also possesses a distinction
which marks it as one of the world's fine cars,
regardless of size or price.

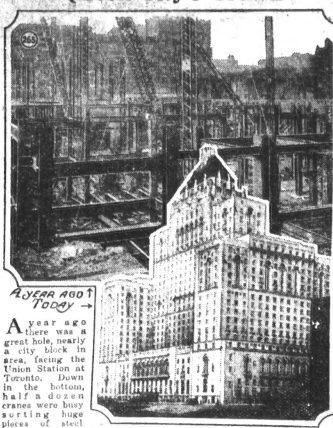

In fact, so pronounced is its air of prestige that
thousands of people who have seen it, and
perhaps ridden in it, have no idea how
astoundingly low is its price.
We will be pleased to show you the many
exclusive features of the finer Oldsmobile
and to arrange for a trial ride. Then you
will realize that no other car so low in price
offers such a comprehensive and balanced
array of truly fine-car features . . . and that
there is a sound basis of value underlying
Oldsmobile prestige.

OLDSMOBILE

PRODUCT OF GENERAL MOTORS OF CANADA, LIMITED

Queen City's Crown

After 800 Years

A year ago there was a great hole, nearly a city block in area, facing the Union Station at Toronto. Down in the bottom, half a dozen cranes were busy sorting huge pieces of steel which were being

not only riveted as they were set, mecam, into position. On that site today stands the tallest building in the British Empire, the magnificent Royal York Hotel which, in two months more will open the doors to ten thousand rooms and welcome its first guests.

Remarkable as has been the speed with which this great Canadian Pacific Hotel has been erected, still more extraordinary to the man on the street must be the tremendous thought which went into the planning of what will be the most up-to-date institution of its kind in the world and in the working out of those arrangements that will ensure its guests the utmost in facilities and service.

There will be, for instance, radio outlets in every room, and in the concert hall, banquet hall and ball room, which have seating capacity for nearly seven thousand people, the most modern means of amplification have been installed to provide, not only that speakers and artists and musicians be thoroughly heard wherever they are speaking but, by connection through the radio room, in any other portion of the building. There is provision also for television, should this be developed, for moving picture and movie-tone projection.

With its own power plant and water-works, its emergency hospital and internal and outside transportation and communication system, the Royal York Hotel is a complete city. It has its bank and brokers offices, its stores and shops, its community hall and recreation centre. Nothing which a progressive town might have has not been thought of and incorporated to advantage. Down in the basement is a complete printing establishment, a library and three theatres.

With a tunnel entrance from Union Station, at the junction of all roads into the heart of the "downtown" site of the Royal York is strategic. With Lake Ontario before it, it is beautiful. The travelling contingent will join with the citizens of Toronto in their eager anticipation of the opening day in June.

CANADIAN GARDENING SERVICE

An Hourly Queen Flower

Where one is looking for something to grow easily in the flower line and yet be sure of abundance of brilliant bloom, both in the garden and for filling the vases indoors, there is nothing that will fill the bill any better than *Blount*. This is an annual and it comes in a range of colors rivaling Joseph's coat. They do particularly well in a new garden. One of the best in the smaller sizes for blooming at the front of the bed, and from there right up to the latest plants which grow three feet high and have flowers as large as the daisy. They bloom early and continue from early summer until frost. They can be started early indoors and transplanted outside after all danger of frost is over or can be planted as seed at the latter time. For big, individual flowers, it is well to plant off half the plants and about the same number of bulbs, having about three flowers coming on at a time. All catalogues contain about a page devoted to strains of varieties from which a selection can be made, ranging from cream, mauve and pink to dark brown, yellow and scarlet. The choice, marigolds, petunias, but the flower, perennials, dahlias and clematis are also recommended where the choice is limited. Common should also be added which will grow with practically no trouble after one thing and weeding.

Poas

The deeper the soil is cultivated the finer and the better quality the pea crop will be. This vegetable requires cool soil for its roots to produce its maximum yield and on this point the grower should be careful. It must be cultivated well. This cultivation will loosen up the soil and allow the roots to penetrate to great depths where they are cooler and will gather more food. It is time to begin thinking of some of the earlier peas now. In this class will come the round-seeded sorts which stand slightly more frost than the finer quality and later wrinkled peas. Of the earlier varieties probably the American Wonder and Little Marvel are the best known. They are both dwarfs, take up little space and yield very well. A little later on, some of the Laxton variety may be used as well as gradus. There are, of course, many varieties and types ranging from the little chap about a foot high which can be planted in double rows and will be self-supporting to the taller sorts which run up four and a half foot and need some support. Peas should be planted with an eye on the variety and the season so that this delicious vegetable may be had at least a month or more instead of just a week. Planting at intervals of one week and using varieties ranging from the very early to the very late will extend the season very materially.

GROWING GREEN DUCKS

Growing green ducks is an occupation which requires handsome profits for the money invested. Experimental work at the Central Experimental Farm, Ottawa, shows that Pekin ducklings, averaged six pounds each in ten weeks, and made a net profit over cost of feed and duckling, of \$1.38 each. The ducklings of the Pekin breed made at least one-half pound heavier gain than ducklings. Ducklings intended for marketing as green ducks, should be of the Pekin breed because of their early developing qualities, and they must be forced by special methods of feeding. Frequent feeding promotes rapid growth. Young ducklings should be fed six times daily from the start until they are two to three weeks old, and five times daily until they are ready for market.

The feed used for growing ducklings at the Experimental Farm Ottawa, is equal parts of bran, shorts and cornmeal, with about ten per cent beef meal added. A little charcoal (about one per cent) is also recommended. This mash should be moistened with water but not made sticky or sloppy. Add only sufficient water to make the meal stick together. Sprinkle coarse sand over the mash before feeding. The sand serves as grit and aids in the process of digestion. Feed only what the ducklings will eat up clean at each feeding.

After the ducklings are four or five days old, some green food should be given such as clover or alfalfa which has been freshly cut, and chopped up fine. Start with only a small amount of this material and gradually increase it until the mash contains about one-fifth green food.

When the ducklings are about six weeks old the green food should be gradually eliminated and at the commencement of the seventh week the mash should be changed to one possessing more fattening properties. The fattening mash, used at Ottawa is 50 lbs. cornmeal 25 lbs. shorts, and

is the best meal with a sprinkling of coarse sand. By the time the ducklings are ten weeks old, they should be in excellent flesh and have developed their first coat of body feathers. This is the right time to market them. If they are kept longer they will change their feathers, and the rate of growth will decrease, thus increasing cost and reducing profits.

Health Service Of The Canadian Medical Association

Are We Healthier?

Because of the tendency to glorify the past, belittle the present and bewail the future, many persons are quite sure that we do not compare favourably with past generations in any way. Yet, we find a distinguished English scholar stating in a review of conditions in England, that "Above all, there has been an amazing transformation in the health of the people, for whom life is wider, better and longer, and death is more remote."

This conclusion is supported by a comparison of conditions in the year 1838 with those in the year 1926. In England and Wales, in 1838 the general death rate was 22.0; in 1926 11.6. This means that in 1926, there were more than ten less deaths for every thousand of the population than there was in 1838. In other words in this period of time, the general death rate has been cut in half. During the same period in London, the death rate of children under five years has decreased to about one-third of what it was. The result of this is that the expectancy of life at birth has been increased by over twelve years.

This represents something which is

not generally appreciated, and yet it has, not infrequently by chance, it has come about because of the interest of governments in the well-being of the people, and because during those years we have had access to the means whereby to control some diseases and to promote the health of the human race.

It is a fact that we today live longer, suffer less from disease and enjoy a larger measure of health than ever before. Remarkable as this progress has been, there remains much more to be done, because we are not by any means using all the power available to fight disease and promote health. More years of health will be ours if we will make the necessary effort to gain them.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

A number of years ago Engineer Donohue, of the Missouri Pacific, experienced a breakdown of his engine on the Kickapoo grade. He went to the telegraph office and sent the master mechanic, W. T. New, the following message, which bids fair to outclass the famous "Oh Agra, Oh Agra!" Mr. New, number two has busied her file, while growing through Kickapoo. What would you have me do? Donohue.

Good Night!

"Don't you think that if I had lived in the olden days, I would have made a good knight?" asked the young man who had bored her for hours describing a moving picture he had seen.

"I don't care so much what you would have been then," observed the girl wearily, "but you might try to see what kind of a good-night you can make now."

Treating Seed Wheat Follow Government Advice in treating your grain by using Copper Carbonate

which aids germination, while the Formaldehyde hinders germination. After ten years experimenting, the Government is strongly urging the farmers to take up this method of treatment. For Sale by

Roy Smith, Bassano

"GIMME, GIMME, GIMME!"

How can any man possibly look as pleasant as this Gymnasium Instructor, with seven charming ladies crying "Gimme" at once? The answer is that the photograph was taken on the Canadian Pacific "Duchess of Richmond" during a cruise of West Africa, the Isles of the West, the Mediterranean. This was the last photograph taken by the late "Toppie" Edwards, father of the modern illustrated newspaper.

March of Silence
First Cook—"What do you do with yourself now that the ice man is out of a job?"
Second Litter—"Well, the man who collects instantaneos on the electric refrigerator ain't such a bad sort."

The Greatest March in all McLaughlin Buick History

THE motor-car buyer... the final judge of automobile values... has registered enthusiastic endorsement of the revolutionary advances made by the 1929 McLaughlin-Buick!

During the past month, McLaughlin-Buick sales have been 25% greater than March of last year... greater than any previous March in all McLaughlin-Buick history.

More people buy McLaughlin-Buick than any other car at or above its price... because the 1929 McLaughlin-Buick with its Masterpiece Bodies by Fisher, has unquestionably established a new standard of performance and a new order of beauty.

Get behind the wheel and get the facts!

When Better Automobiles Are Built—McLaughlin-Buick Will Build Them

In Ancient Spain and Gaul

Right up from the ancient Egyptians who practiced the art of brewing earlier than 450 B.C., the Greeks and Germans used beer as a beverage and understood the principles of malting. Pliny tells us of the use of beer in Spain under the name of "celia," "cecia" and "cerevisia," and says:—
"The natives who inhabit the west of Europe have a liquor made from corn and water. They brew it so well that it will keep good for a long time."

Today Malt Beverages
BEER — ALE — STOUT
are considered Health

TENDERS FOR COAL

Sealed tenders, addressed to the
Purchasing Agent, Department of
Public Works, Ottawa, will be re-
ceived at his office until 12 o'clock
noon (daylight saving), Wednesday,
May 1, 1929, for the supply of coal for
the Dominion Buildings and Experi-
mental Farms and Stations through-
out the Province of Manitoba, Sas-
katchewan, Alberta, and British
Columbia.

Forms of tender with specifica-
tions attached can be obtained from
G. W. Dawson, Chief Purchasing
Agent, Department of Public Works,
Ottawa; H. E. Mathews, District
Resident Architect, Winnipeg, Man.;
G. J. Stephenson, District Resident
Architect, Brandon, Man.; C. H. Sel-
lens, District Resident Architect,
Calgary, Alta.; and J. G. Brown,
District Resident Architect, Victoria,
B. C.

Tenders will not be considered un-
less made on the above mentioned
forms.
The right to demand from the
successful tenderer a deposit, not
exceeding 10 per cent of the amount
of the tender, to secure the proper
fulfillment of the contract, is reserved.

By order,
B. E. O'BRIEN,
Secretary,
Department of Public Works,
Ottawa, April 8, 1929.

Swiss Farmers' Scheme To Liquidate Debts

Are Asking That Federal Government Buy a "Daven Plan"

Swiss farmers, who seem to have the same tendency as American ones for being overwhelmed with mortgages and debts, have just applied to the Swiss Federal Government for a "Daven Plan" in their behalf.

If the scheme works they have no objection whatever to American farmers adopting it, provided they can get it over on Washington.

Naturally, the Swiss Government has no authority for paying the debts of its private citizens, but it can create a special fund in their behalf by appropriating \$100,000 annually. At the end of thirteen years when this fund will total \$1,300,000 the appropriations will cease.

In the meantime the authorities in charge of the fund will undertake payment of the debts and all mortgages of small farmers who appeal to it.

First of all the administrators of the fund in each case will undertake a consolidation of the mortgages and debts of each farmer, preference being given in the case to the claims of the oldest creditors.

When the debt on each farm has been consolidated, payment will be made from the fund created by the state at the rate of 10 per cent. annually, of which 4½ per cent. will be for interest and the remainder for a sinking fund for the payment of the debt itself. Under this system the entire debt will be liquidated in thirteen years.

The only weakness that might appear in the plan to the eyes of a casual observer is that no expert provisions are made for the farmer to pay back the state for having liquidated his debts.

Once, however, the farmer takes advantage of the state's "Daven Plan" to get him out of his debt he no longer has the right to either dispose of his farm or to incur fresh debts on it as a security. He can, however, pay off the complete indebtedness at any time he may wish or may be able to do so, and thus come back into full control of his farm, for the incurring of fresh mortgages and debts, if he so desires.

Stone Damaged By Germs

Will Make Erosion On Hardest Marble In Three Weeks

At the Building Research Station, at Garston, near Watford, England, experiments are continually being made to ascertain the effects germs have on the different kinds of stone. A piece of stone is selected and all its chemical parts submitted to examination. Every organism within the chemicals is examined, and just as they look for the germ which is preying on and causing damage to the human body, so they seek the germ which is preying on what appears to be an inanimate slab of stone, says the Times.

Norway has no one is surprised that millions of invisible germs can play havoc with the soft vital organs of the body, but it may come as a surprise to know that no fewer than sixty different species of germ satisfy their appetite on a diet of hard Portland stone. Experiments have shown that on the surface of stone which is exposed to air the germ will eat its way into the stone. Just as the human body is weakened by the germs, so also is the stone less able to stand the rigors of its climate.

Even hard smooth marble does not come amiss to these bacteria, and, incredible as it may seem, experiments reveal that they will make an erosion on the hardest marble in three weeks.

Pheasants For Alberta

An additional 2,000 ring-necked pheasants, 600 Mongolian pheasants and 300 pheasants' eggs for hatching will be brought into Alberta this year by the Game Fish and Game Protective Association and released in selected districts south and southwest of Calgary. In the past few years a few thousands of different varieties of pheasants have been imported and released by the Association and the birds have thrived and flourished to a degree beyond the most sanguine expectations.

Alberta Wheat Pool Elevators Fifty-three elevators will be built, at as many different points by the Alberta Wheat Pool this year. This will bring its total up to 374 elevators.

More than 84,000 of England's athletes received poor relief in September of 1928.

Empire Marketing Board

Spending Money To Create An Interest In Canadian Farm Products

A bulletin from the Saskatchewan Department of Agriculture draws attention to the fact that Canada is spending money liberally to create an interest in Canadian farm products in the British Isles, and that the Empire Marketing Board, in its turn, is educating the people of the British Isles to purchase Canadian farm products. It points out that the British Empire holds unexcelled opportunities to develop markets within her own borders, and urges the farmers of the West to take advantage of the opportunities thus created to establish a market which will be permanent in character and ultimately more profitable.

A London chronicler has been trying the effect of a new tonic on a mouse. He was more than satisfied, when the mouse died, and he therefore put its tongue out at the cat.

Mild Weather Thaws Igloos

Baldness Are Made Homeless By Action Of The Sun

It might be expected that winter would be winter at Tavane Bay. For Tavane Bay is 350 miles north of Fort Churchill, where the Hudson Bay Railway, through Manitoba, to the rich northern mineral fields, will end. But the North has been much milder, and the Eskimoes will tell you that. As usual, this past winter, the Eskimoes of Tavane Bay built their igloos, their little round houses of snow and ice. As usual they were buried now and again by blizzards. But quite out of the usual pattern was the thaw which struck them just after Christmas. The temperature soared to 21 degrees above zero. The walls of the igloos collapsed, and dozens of families were made homeless. Yet the Eskimoes were cheerful. Their attitude was: "Who said our country was frozen up? And building materials were cheap. As soon as the weather was normal again, they set to work and rebuilt.

Vancouver Grain Port

Going Ahead With Port Development

Vancouver is experiencing a movement of grain comparable to that of the rush season. Storage on March 15th was 5,210,183 bushels in Vancouver elevators, with 534 Canadian Pacific cars on spurs, and 663 cars west of field. There were 15 boats on port with a usual capacity of 75,000,000. Lake head storage was 17,479,000 bushels in elevators with an additional 8,655,000 in boats for winter.

Preparing for continued growth of the westward flow of grain from the Prairie Provinces, Vancouver is going ahead with port development on a big scale.

Cal's eye is a kind of quartz, much valued as a gem, opalescent, and of various shades.

PHILIP'S MILK

When Food Sours

Philip's Milk is the only milk that is guaranteed to be pure and sweet.

New Use For Mathematics

Can Be Invaluable In Studying Epidemics Says Sir Ronald Ross

War on influenza has been declared by Sir Ronald Ross, of London, England, whose mathematical searches have saved the lives of thousands. Mathematics will be his ally in the work which is being carried out jointly by Sir Ronald and Dr. Hilda P. Hudson that the Royal Society is studying intently.

"There are many events that happen to a proportion of the public which we call 'happenings,'" said Sir Ronald. "And all these happenings have their equations. Influenza epidemics, going down with measles, being killed by London traffic, making a fortune—all these things are 'happenings' and all have their equations. The equation will tell you why so many people have got run over, what chances you have of getting struck by lightning or of losing a fortune, when we may expect a wave of a particular illness, and much more. The equation we get for every type of epidemic will be a something obtained by mathematics which will be of great help to medicine. It will be a hypothetical method of studying epidemics which will help the work of prevention in such an epidemic as the present one of influenza. Amazingly wide search of records will have to be made to provide us with the figures we require.

We know that an epidemic will be due to exhaustion of its supply of material. It is rather like a plague that is eventually wiped out because it has killed everybody. Such things as these we know. There is much more to be discovered by equations. Sir Ronald Ross' malaria work so depleted his resources that he had to sell his research archives.

Excaloped Macaroni With Cheese

1½ cups Borden's St. Charles Macaroni
3 cups cooked, drained macaroni
1½ cups grated American cheese
1½ tablespoons butter or butter
1½ tablespoons salt, scant
1½ teaspoonful pepper.
Few grains paprika.
Make a white sauce of the flour, butter, seasoning and the milk, well stirred. Stir in the macaroni. Thoroughly oil a rather shallow baking dish, put in a layer of the macaroni, then one of the cheese, continuing in this way until all is used and making the last layer one of cheese. Bake in a moderate oven until browned, about thirty-five minutes.

Very slow plumber: "Oh, I remember your little boy, Mum. 'E were in the infant's class when I went to a job at the school some time ago."

Exasperated Lady: "Indeed. And what class was he in when you'd finished?"

Calgary's Auto Club

Calgary's Auto Club now has 814 members, of which 145 are taking instruction.

Compulsory Insurance

Privately owned automobiles will be exempt from compulsory insurance for one year at least in the province of Alberta according to a provision of Alberta's new Traffic Act recently distributed to members of the Legislature. Taxation and heavy cars of all descriptions will be compelled to carry a specific amount of insurance.

Young women in Japan are rapidly taking the place of men as elevator operators, as well as in many other positions connected with business and industrial advancement.

PHILIP'S MILK

When Food Sours

Philip's Milk is the only milk that is guaranteed to be pure and sweet.

Nextest War Will Be Sudden

English Professor Says Britain Could Not Wait To Commit Domains

Great Britain will either lose the next war or lose the Dominions, Brigadier-General J. H. Morgan, I.C., professor of constitutional law at the University of London, said in a lecture at the university.

"Such importance is attached to the work which is being carried out jointly by Sir Ronald and Dr. Hilda P. Hudson that the Royal Society is studying intently."

"There are many events that happen to a proportion of the public which we call 'happenings,'" said Sir Ronald. "And all these happenings have their equations. Influenza epidemics, going down with measles, being killed by London traffic, making a fortune—all these things are 'happenings' and all have their equations. The equation will tell you why so many people have got run over, what chances you have of getting struck by lightning or of losing a fortune, when we may expect a wave of a particular illness, and much more. The equation we get for every type of epidemic will be a something obtained by mathematics which will be of great help to medicine. It will be a hypothetical method of studying epidemics which will help the work of prevention in such an epidemic as the present one of influenza. Amazingly wide search of records will have to be made to provide us with the figures we require.

We know that an epidemic will be due to exhaustion of its supply of material. It is rather like a plague that is eventually wiped out because it has killed everybody. Such things as these we know. There is much more to be discovered by equations. Sir Ronald Ross' malaria work so depleted his resources that he had to sell his research archives.

Bible Three Centuries Old

Was Used To Swear In New Vice-President Of United States

A most unusual Bible was used to swear in the new Vice-President of the United States, Charles Curtis, of Kansas. It is the property of E. M. Geis, of Salina, Kansas, and is 300 years old. The Bible has been in the Geis family at least five generations. It was printed in Cologne, Germany, in 1640, and was copyrighted by English Puritans. It is bound in worn leather with wooden inner covers. The book is printed in two columns, red and black, in clear fount type, and contains many woodcut pictures. One scene shows an angel driving the devil out of Paradise. Satan is shown as a large horned demon. On the frontispiece, which bears the German imperial seal, are depicted a series of scenes, the first being the medieval artist's conception of the fall of man. Eve is shown handing Adam an apple. The second is of an angel driving the two out of the Garden of Eden.

Very slow plumber: "Oh, I remember your little boy, Mum. 'E were in the infant's class when I went to a job at the school some time ago."

Exasperated Lady: "Indeed. And what class was he in when you'd finished?"

Heart Palpitated Nerves Bothered Her Sleep Was Broken

Mrs. Fred A. Puppely, East Southam, N.S., writes: "I was bothered very much with my nerves and palpitation of the heart, and my sleep was broken at night."

I decided to try

and after I had taken six boxes I found that they had done me much good. I will gladly recommend them to all who are troubled with nervousness, sleeplessness caused by their heart and nerves."

Price per box at all druggists and dealers, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

WORLD HAPPENINGS BRIEFLY TOLD

How J. E. Carroll, vice-president of the Quebec Liquor Commission, received official notification that he had been named lieutenant-governor of the province of Quebec.

R. B. Graham, Crown prosecutor in the Winnipeg police court since 1913, has been appointed police magistrate in succession to Sir Hugh John Macdonald, deceased.

Pending the world-wide abolition of slavery and forced labor, victims of the two institutions should at least enjoy the advantages of the eight-hour day, according to the International Labor Bureau at Geneva.

Cried in bright sweaters, knickers and high boots, with pack necks slung across their backs, Hilda Beaton and Barbara Thorning, two English girls, have set out from Toronto on the first leg of a journey to Vancouver, B.C.

Negotiating a distance equal to that around the world at the equator, 25,000 miles, a motor cycle which carried eight British drivers in relays for 23 days and 22 nights covered the entire distance, 25,130 miles, in 554 hours 8 minutes.

The Manitoba Department of Education has agreed to form a circulating library of professional books for school teachers. By paying the postage on books all teachers in the province will be able to secure this aid in their profession.

Miss Ellen Hemmen, B.B., of Mount Allison University, Sackville, N.B., won the travelling scholarship awarded annually by the Canadian Federation of University Women for 1929-30. Miss Hemmen is dean of women, and instructor in the department of French, at Mount Allison.

E. W. Beatty, president of the Canadian Pacific Railway, stated that the Duke of Gloucester, third son of the King, would open the new railway hotel being completed in Toronto, provided he could be in Toronto at that time. The Duke of Gloucester will arrive at Vancouver in June to start a tour.

Zepp Making More Trips

The Graf Zeppelin, which made a round trip flight across the Atlantic last fall, will make a second westward flight to the United States in May, a third in June and a fourth later in the summer. It is announced by F. W. Von Flotow, recently appointed special American representative of the Luftschiffbau Zeppelin Company, of Friedrichshafen, Germany.

New Idea In Surgery

Dr. Karl Hutter, of Vienna, reveals a method of performing a bloodless surgical operation with a new shaped electrode, which coagulates and removes diseased tissue without the use of a knife. It has been used so far to remove warts, hemorrhoids, moles, and the like, but can be used for more serious operations, Hutter said.

All are born with equal opportunity, but all are not born with equal luck.

For Influenza

The Linctant That Relieves All Ailments

MINARDS LINCTANT

"KING OF PAIN"

W. N. U. 1780

New Theory Would Revolutionize Lighting

Professor Thinks Artificial Freedom

Artificial freedom as big as penicillin is being used in libraries or living rooms in place of electric lamps, the new theory would revolutionize lighting. The lamps he foresees would live and would incidentally be immortal, recasting themselves from their ashes like the Phoenix of old.

And whereas the fiery of nature city flashes, burning up the tiny amount of "oil" in its lamp and then staying dark again until it has refueled his oil, the robot fiery device would be so contrived as to give a continuous glow, reforming a part of its "oil," which is technically called "luminescence," as it burns the first, this being an incessant process. "Chemically," said Prof. Harvey, "luminescence is probably to be placed among the simplest members of the proteins, the peptides or proteoses, and the question as to whether we shall ever be able to reproduce living light becomes the question whether we shall be able to synthesize the protein. Personally I think that will come in the future. We now synthesize fats, sugars and some of the polypeptides, which are simple proteins."

"It is only a matter of time for synthesis of the more complicated compounds of which luciferin is a member."

Prof. Harvey, who has made a study of all those animals which are endowed with luminescence, employed as searchlights, as lanterns and as sex attractions, said he had found forty groups of the animal kingdom and two groups of plants to be luminescent.

World's Greatest Song Writer

Schubert Thought Music As Easily As People Think Conversation

A few months ago the funeral of Franz Peter Schubert's death was celebrated all over the world, because he was the greatest song writer who ever lived.

He wrote over six hundred songs, thirty operas, six masses, several symphonies, and innumerable works for piano and string instruments, many of them of such beauty that they will live for ever. This he did simply because his brain thought music as simply as ordinary people's brains think of ordinary conversation.

He died when in his early thirties, an irreparable loss to the world, and was financially poor. All that he left was the equivalent of \$12,500 in Canadian money.

Just recently the original manuscript of one of his songs, "The Erl King," was sold for \$5,000.

Will anyone give five cents one hundred years hence for the original manuscript of "Yes, We Have No Bananas," or for a whole carload of the "blues" songs which are so popular today?

Limestone In Canada

Every province in Canada except Prince Edward Island contains workable deposits of good quality limestone. In the case of Saskatchewan, the limestone is inaccessible at present and it is not worked. Ontario is the principal producer.

Chrysler - Plymouth

CARS ARE NOW
THE LOWEST PRICED CARS IN THE WORLD

Equipped with Lockheed Hydraulic 4 Wheel Brakes, quality built, and having a full sized Sedan Body.

4-DOOR SEDAN	\$1,115	DE LUXE COUPE with	
COUPE	\$1,045	rumble seat	\$1,095
CLUB SEDAN	\$1,085	ROADSTER; rumble seat	\$1,075

If Quality and Economy Appeal to You, Consider these Points

Chrysler's standardized precision methods of manufacture means quality is built into the Plymouth cars as well as the more expensive Chrysler models.

Chrysler Plymouth cars excel in gasoline and oil consumption, upkeep, and repairs.

Lockheed hydraulic 4-wheel brakes are self-equalizing and eliminate constant attention. It is not an uncommon occurrence for a Chrysler built car to go 25,000 miles without a single brake adjustment.

Chrysler Plymouth bodies are more roomy, and comfortable than any other car in the price class or even higher. Riders heavily built, double-braced.

Chrysler and Plymouth cars lead in re-sale value as a used car.

Chrysler Plymouth engines have more main bearing surface than most low priced six cylinder cars on the market, and unlike cars in this price class, has full force feed lubrication.

A daughter was born to Mr. and Mrs. H. Mathew, of Cochrane, on Friday, April 5th at the local hospital Geo. Pruitts, of Majorville, is doing nicely after an operation. He is in the hospital at the Bassano Hospital. Knox Church Ladies Aid will hold a tea and sale of home-made candy in the church basement on Wednesday May 1st, from 2:00 to 4:00 p.m.

Anglican Church service next Sunday, April 14th, will be at 7:30 p.m. as usual.

Little Robbie Pragnall, who has been in the Hospital for some time, returned home Thursday much improved.

A number of Hussar people were in Bassano Wednesday evening for the Masonic social, among them being Mr. and Mrs. C. W. Hayes, Mr. and Mrs. W. O. Nelson, Mr. and Mrs. R. J. Bell, Mr. and Mrs. L. Woodford; also Mr. and Mrs. R. Weir from Makepeace.

Mr. and Mrs. Chapin, of Regina, are visiting this week with Mrs. E. Leonard. They are on their way home after spending a vacation at the Pacific Coast.

Miss Gladys Hayes and Roy Hayes spent Sunday in Hussar with their parents.

Mr. and Mrs. T. H. Hunter and Patsy were in Calgary over the weekend.

CARD OF THANKS

We wish to extend our thanks to our many friends for their kindness during the recent illness of our son Robbie, who is now much better.

Mr. and Mrs. F. Pragnall
